POULTRY HOUSE RECORD

If you have both hens and pullets, and they are kept separate, you may draw a line between each of the columns for your pullets and hens. Daily records should be kept in the hen house or in the kitchen. A large calendar works well. Total each month's record and place on this sheet.

Month	No. of birds at beginning	No. of birds culled	No. of birds died	No. of birds added	No. of birds at end	Total eggs laid

Total birds culled during year

Total eggs produced for year

INCUBATING, BROODING AND REARING RECORD

Each lot of birds or eggs should be listed separately. For example, you would record the date you get your chicks and the date you sold the extra roosters and placed the rest on range or considered them as young replacement stock. If you hatch your own you would also put in the date you set your eggs and the date they hatch.

Eggs Set		Eggs Hatched		Birds Placed in Brooder		Birds Remaining (10 weeks)		Sold or Kept (22 weeks)	
Date	Number	Date	Number	Date	Number	Date	Number	Date	Number
