Industry Overview & Economic Characteristics

Industry and economic data provide insight into the forces shaping a community's business environment and overall economic health. Information on top industries by labor force participation, economic output, imports and exports reveals where jobs are concentrated, which sectors generate the most value, and how the community connects to regional and global markets. Additional indicators such as total businesses, recent business license activity, employment distribution, unemployment rates and countywide visitor spending highlight entrepreneurship, workforce conditions and economic diversity, and offer some insight on the role of tourism. Together, these data points can support informed Main Street revitalization strategies that strengthen existing businesses, attract new investment, and build a more resilient and competitive local economy.

Unmet Demand for Business & Service Overview

This data illustrates possible unmet demand for businesses and services by comparing the number of identified establishments in each of the defined key categories within the specific community to those present elsewhere in the county overall. By highlighting gaps and business voids, the data identifies areas where local demand may be leaking to surrounding communities. These insights can help Main Street stakeholders prioritize business recruitment, support entrepreneurial opportunities, and guide investment toward services most needed by residents and visitors. Understanding these gaps is essential for strengthening the local economy and creating a more complete and competitive commercial district.

A void analysis was conducted to identify potential unmet demand for specific types of businesses and services in Tonopah, NV, using Nye County as the comparison area. Voids represent business types present elsewhere in the county but not within Tonopah in 2025.

The results show gaps across all six categories analyzed. Tonopah has significant shortages in big box, financial and health care-related services, with zero or few identified businesses in these sectors. Additional gaps also exist in retail, restaurant and clothing services.
